

## Jobs for Languages graduates

Learning a second language assists in developing and improving communication skills, and enhancing socio-cultural understanding. Proficiency in a second language improves career prospects and helps foster social and economic benefits for Australia in, for example, the fields of tourism, education, international law, commerce, education and sport.

## Where can our graduates go?

With the internationalisation of the job market, graduates with a qualification in a foreign language will, in future, have greater employment opportunities both in Australia and overseas such as: tourism, foreign language teaching, international trade, finance and commerce, diplomatic and defence agencies, translating services, and international development.
